

Building Envelope Consultants and Scientists, LLC.

Continuing Education Programs

The American Institute of Architects (AIA) has recognized BECS as a Registered Continuing Education Systems (CES) Provider. These programs are ideal for holders of professional engineering and architectural licenses who need to meet the requirements for professional development hours or for owners and managers who are looking to better understand their buildings.

BECS' education programs are approved for credit by AIA and are designed to educate participants about specific products, processes, and systems. We host these programs at your company's office and provide a complementary lunch.

Current Available Courses:

- **Building Enclosures and Mechanical Systems: Working Together to Keep the Outside Out and the Inside In**
- **Building Envelope Theory and Practice**
- **Working at Height: Fall Protection Policies and Regulations**
- **Wood Frame Balconies Design and Construction Deficiencies**
- **Preservation of Historic Concrete**
- **The Art and Science of Cleaning Masonry**
- **How Good Re-Pointing Practices Guarantee the Long Life of the Mortar Joint**
- **Below Grade Water Proofing Solutions**
- **Restoration Technologies in a Sustainable Culture**
- **The Science and Craft of Sealant Replacement**

To schedule a BECS Continuing Education Program for your office, please contact KJ Rodgers, 443.873.6203 or by email at kj.rodgers@becsmd.com.
