Tommy is an Assistant Project Manager at Building Envelope Consultants and Scientists, LLC. He has experience in building enclosure and repair / restoration design with existing, historic, and contemporary construction, involving facades, roofing, waterproofing, and structural repairs. He is a SPRAT Level 1 Rope Access Technician and has experience with rope access / difficult access assessments of several building facades.

As an Assistant Project Manager, he performs condition assessments, prepares reports, project specifications and repair details, and performs construction contract administration services. Tommy earned a Bachelor of Science and a Master of Science in Civil Engineering from Virginia Tech and is a registered EIT in pursuit of his professional engineering license.
